

# Stellar® Large OTR Tire Service Trucks

# 9000-RS OTR

The Stellar 9000-RS (Rack Side) OTR series, features a rugged, heavy-duty 15' steel OTR service body with over 60 cubic feet of storage. The standard driver-side rail folds down, and includes sign boards for identification.

The 9000-RS OTR is equipped with a model 9000 hydraulic knuckleboom crane. This crane is operated by a standard fully proportional radio remote control. The hexagon shaped secondary and extension boom greatly increase boom strength over competitive square-shaped booms, ensuring solid performance.

The tire sizes the 9,000 lb. crane can lift include the 36.00-51 mounted narrow base and 50/65-51 wide base tires (crane only). The performance of the 9000 OTR series can be enhanced by the addition of the TM4110 Tire Manipulator.

The TM4110 allows versatility while providing a safe method to handle a variety of OTR tires up to 110 inch diameter, or 4,600 lbs. It also offers 140° of articulation and 240° of body rotation giving the TM4119 the ability to service fleets with small to medium sized OTR tires.
