Improved 23000 OTR Tire Service Crane Available

Summary: Stellar Industries has developed an all-new Stellar® model 23000 OTR tire service crane and the TM12154 tire manipulator. The model 23000 is a 230,000 foot-pound capacity crane that can lift 23,000-pounds at 10-feet and 14,000-pounds at 16'5" from the centerline of the crane. The addition of the TM12154 tire manipulator can accommodate tires from 48" to 154" in diameter and up to 12,000-pounds. This crane fills a niche to service the equipment in large quarry applications and the small mining facilities.

Garner, Iowa – Stellar Industries, Inc. has developed an all-new Stellar® model 23000 OTR tire service crane and the TM12154 tire manipulator. Its design was based from the proven model 28000 crane to provide maximum lifting performance and solid stability while servicing a versatile selection of equipment in the large quarry operations, small mining facilities and other off the road tire service markets.

The model 23000 crane has a 230,000 foot-pound capacity and can lift 23,000-pounds at 10-feet and 14,000-pound capacity at 16'5" from the centerline of the crane. It offers 315 degrees of rotation while using a turntable bearing with a high torque planetary gear reduction system that offers smooth, powerful performance with ease of serviceability. It features a hexagonal boom design that adds strength and durability and a radio remote control system that offers precise, smooth, multi-function operation as a standard feature. The 23000 also features a hydraulic A-frame style out and down stabilizing system that allows for a large working area.

The enhanced TM12154 tire manipulator is an option for the model 23000 crane. The

TM12154 can manipulate tires from 48" up to 154" in diameter and up to 12,000-pounds. It features over 315 degrees of body rotation, and either 90-degree or continuous rotation clamping pads. The tire manipulator articulation spans from +81 degrees to -20 degrees.

A complete package is available. It includes the crane, tire manipulator, and a 20-foot long steel service body complete with eight D-ring tie downs, stainless steel rotary slam latches, recessed skirt-mounted halogen floodlights, and an underbody protective coating. It also comes with a SHD-245 American Eagle air compressor. The SHD-245 is an industrial truck mounted 4-cylinder, 2-stage compressor powered by a hydraulic motor and outputs 110 CFM at 175 PSI.

"Over the years Stellar has become the leading supplier of OTR tire manipulating cranes," says Tim Davison, manager of bodies and cranes. He continues, "Stellar achieved this status by its unequivocal ability to listen to its customer's needs, and as is the case with the 23000, we delivered." Davison concludes, "We started with our solidly designed 28000 crane to design a strong, smooth performing crane that will service various markets. Not only is it a high capacity crane that is versatile, it is also designed and built strong, and is easy to maintain and service."

Stellar Industries, Inc. was founded in 1990 in Garner, Iowa. It is an employee owned and operated manufacturer of hydraulic truck mounted equipment. Products include hooklift hoists, cable hoists, container carriers, telescopic cranes, articulating cranes, work truck accessories and the X-Tra-Lift pick-up loading device. Stellar also offers complete mechanic service truck and tire service truck packages. Stellar is a progressive company that focuses on its people, as they are the key to making the products and the company successful.
