New 3200-Pound Capacity Economy Crane Loaded with Features

Garner, Iowa -- Stellar Industries, Inc. is introducing the EC3200 electric/hydraulic telescopic crane to its economy crane series. The EC3200 has an 11,500 ft lb rating, and has a lifting capacity of 3,200 lbs. This new economy crane has 15' of reach, and accomplishes this with less than 8' of stowed length. It also has a low stow height of only 24", is one of the lightest cranes in the market, and has a unique mounting configuration allowing it to be mounted on a body with 20" or 14" deep compartments. The EC3200 is the first crane in its class to offer a radio remote control as a standard feature.

Other features that make this crane a leader in its class include the unique Double Boom design, an all steel gear bearing rotation system, integral rotation stop and cylinders designed specifically for this crane,

"Stellar designed the EC3200 crane based on customer demand for a durable crane with more features than others currently available in the electric/hydraulic 3200 pound capacity product segment," Says Tim Davison, Stellar Industries' Product Manager for Bodies and Cranes. "We wanted to provide big crane attitude, with a little crane size, and we've done just that," continues Davison. "We've created a crane that serves the price conscious market, while providing more features and better performance than this industry has ever seen before.

Stellar Industries, Inc. was founded in 1990. It is an employee owned and operated manufacturer of hydraulic truck mounted equipment located in North Iowa. Products include hooklifts, telescopic cranes, articulating cranes, and the X-Tra-Lift, as well as complete mechanic service truck packages, and tire service truck packages. Stellar is a progressive company that focuses on its people, as they are the key to making the products and the company successful.
