## **New Container Carrier with Rotator Now Available**

**Summary:** Garner, Iowa based Stellar Industries has released the ECCR, the Extendable Container Carrier with Rotator. The Stellar® ECCR boasts an 8,000-pound lifting, dumping and transporting capacity. It features extendable forks for easy pick-up and placement of containers, continuous rotation for dumping from either side, and has the ability to distribute significantly more weight to the front axle than existing Stellar® or competitive models. Other features include improved visibility of rear lights, less cylinders and seal kits to maintain, and an overall heavy-duty construction.

**Garner, Iowa** – Stellar Industries, Inc. is introducing the addition of the ECCR, the Extendable Container Carrier with Rotator. The Stellar® ECCR boasts an 8,000-pound lifting, dumping and transporting capacity. It features extendable forks for easy pick-up and placement of containers, continuous rotation for dumping from either side, and with proper weight distribution calculations and at full rated capacity, the ability to distribute up to approximately 20% of total unit weight\* on the front axle when using an 84" CA conventional chassis, instead of the approximate 4% by other competitive models. The centerline of the container is 24" closer to the front axle on the new ECCR than the current container carrier model Stellar offers, and up to 43" closer than some competitive models. With the improved stowed position of the container, the brake, stop and turn signal lights are easier to see, and trailer hitch options are more convenient to access.

All these great features come at a competitive price, while being supported by a 36-month structural warranty and a 12-month parts and labor warranty.

"Stellar wanted to introduce a more efficient and superior product to this market," says Glenn Rasmus, Demountables Sales and Product Manager for Stellar Industries. "In working toward our goals, Stellar was able to design a container carrier with better weight distribution that allows the driver to haul bigger loads with better weight balance and with fewer trips, which keeps waste haulers doing what they do best," Rasmus adds.

Stellar Industries, Inc. was founded in 1990. It is an employee owned and operated manufacturer of hydraulic truck mounted equipment located in North Iowa. Products include hooklifts, cable hoists, container carriers, tarping systems, telescopic cranes, articulating cranes, and the X-Tra-Lift, as well as complete mechanic service truck packages, and fire service truck packages. Stellar is a progressive company that focuses on its people, as they are the key to making the products and the company successful.

For more information regarding Stellar Industries, Inc., visit [www.stellarindustries.com](http://www.stellarindustries.com), or call 800-321-3741.

\* Weight distribution will be dependent on chassis make, model & configuration.
