New Stellar® TMAX™ Series Mechanic Crane Bodies Released

Garner, Iowa – Stellar Industries, Inc. is introducing a full line of TMAX Series mechanic service crane bodies that pair perfectly with the Stellar line of heavy-duty cranes, especially those equipped with the Stellar® CDT™ control system that features the boost mode.

The entire line of TMAX bodies are designed to accommodate the heavy duty crane line from Stellar Industries that includes the new 44,000 ft-lb Model 7621 through the 70,000 ft-lb Model 14528. The TMAX Series of bodies use a stronger torsion box understructure while incorporating the proven Torq-Isolator crane compartment and an E-coat primer originally introduced on previous model crane bodies. These bodies have been specifically designed to accommodate the Stellar CDT equipped cranes that offer the boost feature, which allows the crane to lift up to 118% its normal capacity for a short period of time. They also feature up to 60" high and 22" deep compartments with double panel doors, stainless steel hinges and door handles.

"With the addition of the Stellar CDT equipped cranes, Stellar has also upgraded our mechanics body offerings with the TMAX Series to take full advantage of all the Stellar CDT design has to offer" says Tim Davison, product manager, bodies and cranes.

Stellar Industries, Inc. was founded in 1990 in Garner, Iowa. It is an employee owned and operated manufacturer of hydraulic truck mounted equipment. Products include hooklift hoists, cable hoists, container carriers, telescopic cranes, articulating cranes, work truck accessories and the X-Tra-Lift pick-up loading device. Stellar also offers complete mechanic service truck and tire service truck packages. Stellar is a progressive company that focuses on its people, as they are the key to making the products and the company successful.
