Stellar Industries Introduces Slider34 Hooklift

Garner, Iowa -- Stellar Industries, Inc. is introducing the Slider34 Hooklift loader. The Slider34 is a sliding jib style hooklift with a maximum lifting capacity of 34,000 pounds. The sliding jib allows the Slider34 to accommodate container bodies varying in length from 14-foot to 20-foot. It offers a choice of fixed hook height, allowing it to pick-up bodies with a 54-inch or 61.75-inch hook height. Another new feature of the Slider34 is the use of the hexagonal jib. Its geometric shape adds strength, reduces flexing and makes it easier to replace wear pads.

Other standard features of the Slider34 include stainless steel pins, permanently lubricated and greaseable bushings throughout, patented dump/load interlock system, and DuPont® Imron® 5000 paint, which are also found on all other Stellar hooklift models.

"The development of the Slider34 allows us to better compete in markets that have previously seen little penetration," says Glenn Rasmus, Hooklift Sales and Product Manager for Stellar Industries.

Stellar Industries, Inc. was founded in 1990. It is an employee owned and operated manufacturer of hydraulic truck mounted equipment located in North Iowa. Products include hooklifts, telescopic cranes, articulating cranes, and the X-Tra-Lift, as well as complete mechanic service truck packages, and tire service truck packages. Stellar Industries recently acquired the complete line of K-PAC waste handling equipment to its product line including cable hoists and garbage compactors. Stellar is a progressive company that focuses on its people, as they are the key to making the products and the company successful.

For more information regarding the Slider34, a digital version of this article, as well as digital images please visit www.stellarindustries.com, or call 800-321-3741.
