

COMMERCIAL ROAD SERVICE / TRUCK STOP

STELLAR® 1004 TRUCK STOP

TECHNICAL SPECIFICATION GUIDE

The Stellar® 1004 Truck Stop Service Body is a fuel efficient service body for the commercial road service and truck stop market. The automotive styling makes the Stellar 1004 Truck Stop a unique and attractive package to represent your company's image. Built to mount on a Ford Transit and RAM ProMaster van chassis, the Stellar 1004 features aluminum and fiberglass construction to maintain a strong yet light weight construction. The aluminum frame and floors are formed and welded, and the fiberglass shell is impregnated with gel coat to match standard white chassis to provide long lasting, durable finish.

The 1004 Truck Stop body comes equipped with large front compartments and drop down doors for maximum tool storage and un-restricted access. The longer horizontal compartments are ideal for air reels and fuel hose for road service applications.

The Stellar 1004 Truck Stop can be mounted on a Ford Transit or RAM ProMaster van chassis with 82-83" CA. The body is 10-foot long and features a 49.5" wide load bed and 12.8" deep side packs. The load bed floor and walls are made of durable, lightweight and corrosion resistant aluminum.

Shown on a Ford® Transit chassis.
