

COMMERCIAL FLEET TIRE SERVICE TRUCK

STELLAR® 1302

TECHNICAL SPECIFICATION GUIDE

State of the art componentry and extensive field research have come together in Stellar's 1302 the ideal, multi-functional tire service truck capable of meeting any size commercial tire dealer's needs.

11-foot, 13-foot, or 15-foot aluminum body options center around an advanced use of design and materials. With a standard body weight of approximately 1000 pounds, maximized payload and better fuel economy are easily realized. The 43" high x 96" wide body is designed to hold 3 rows of 8 standard truck tires. With the addition of 29" high rack extensions, you more than double the 1302 Elite's tire hauling capacity. The 1302 Elite's sub-structure is based around the industry proven extruded aluminum plank floor, designed to be stronger, more durable, and last longer than a flat sheet of deck plate floors commonly found on most tire service bodies.

The curb-side front vertical cabinet has standard 3/8" x 50' and 1/2" x 50' hose reels along with an air filter and regulator mounted to the top of the compartment for ease of accessibility. Options include a 2-drawer cabinet with a 15-pin socket rack and compartment lights.

Service Body Features

- 11-foot, 13-foot, or 15-foot long aluminum body
- 43" high x 96" wide body is designed to hold three rows of eight standard truck tires
- 26-inch wide front vertical compartments
- Jack box / storage compartments
- 29" racks for more hauling capability
- Skirt-mounted LED floodlights
- Truck-Lite rubber-mounted running lights
- Seamless 22" high sign panels
- Extruded aluminum plank floors
- Standard master control panel mounted in the cab
- Curb-side front vertical cabinet has standard 3/8" x 50' and 1/2" x 50' hose reels
- 72 cubic feet of storage
- 2000-pound all-hydraulic liftgate
- Options include a 2-drawer cabinet with a 15-pin socket rack and compartment lights.

SPECIFICATIONS

Twenty-six-inch wide front vertical compartments with box extensions are standard. The available air compressor options are located top center in the truck bed. Here the compressor is protected from the elements, is easier to maintain and service, and provides for a better balanced truck.

Also included are rounded automotive style wheel wells with standard LED built-in flood light on both left and right sides.

Fold back door design for unobstructed access to tool storage compartment. Standard features are the rear body tool compartments with slide top doors.

A 26" vertical cabinet as shown from the driver's side. Note the four large adjustable shelves and the heavy duty reinforced door design with stainless steel hinges. All door hardware is bolted on with stainless steel bolts and lock nuts. The optional road service strobe light is located on the compartment top.

All of the tool compartments feature the black, powder coated compression style T-handle with tamper resistant locking mechanism.

Fold back door design allows for full access to the lower mounted jack box / storage compartments that are standard.

Optional tall rack/solid side for increased tire handling and longer sign panels for more advertising.

Air Compressor Options

- SGD-2240, gas driven 22HP engine, 40 CFM @ 175 PSI
- 46P, hydraulic driven direct drive, 46 CFM @ 175 PSI

Direct Hydraulic Liftgate Features

- Electric-hydraulic lift with 2000-pound capacity
- Grip-strut platform provides non-slip footing
- 34-inch loading platform
- Dual cylinders for stable lift
