AIR COMPRESSORS ★

MOBILE AIR ON DEMAND

Stellar® Air Compressors Give You Air Power When And Where You Need It

TRUCK-MOUNTED AIR COMPRESSORS

Save time by bringing power straight to the field with Stellar Air Compressors. Whether you need to power pneumatic tools or inflate tires, Stellar mounted air compressors put productivity at your fingertips.

Stellar Air Compressors are used in a variety of industries, including:

- + Agriculture
- + Construction
- + Equipment Dealer & Repair
- + Forestry & Logging
- + Government & Municipalities
- + Landscape & Tree Care
- + Mining & Aggregates
- + Oil & Gas
- + Railroad
- + Rental
- + Utility Construction

DURABLE AND DEPENDABLE

All Stellar Air Compressors are built to our stringent standards for reliability and long-term performance in rigorous working conditions. Designed for smooth operation and long life, Stellar's hardworking air compressors have a multi-decade history of proven efficiency and durability.

EASY MOUNT

Stellar TMAX™ Aluminum Mechanic Trucks feature an exclusive extruded aluminum top with two drill-free mounting rails for quick installation of air compressors and other accessories.

Single-Stage Hydraulic Air Compressors

With a direct-drive system that has no belts to replace or adjust, the built-in reciprocating pump lets you get right to work. The crankcase and cylinder heads are made of cast iron for durability, and micro-honed connecting rods ensure smooth operation and long life.

Models range from 8 to 70 cubic feet per minute (CFM).

Two-Stage Hydraulic Air Compressors

Because two-stage air compressors produce higher air power, they're the go-to option for large-scale operations and continuous applications. They can maintain pressure over extended periods of time and refill faster, so they use less energy to get the job done. Stellar's design eliminates head gasket issues and includes a heavy-duty commercial-grade two-stage reciprocating pump.

Models range from 23 to 110 CFM.

Rotary Screw Air Compressors

Get continuous air on demand with no reservoir limitations and no overheating concerns. The precision-engineered air-end on Stellar Rotary Screw Air Compressors is oil-injected to eliminate metal-to-metal contact of the two compressor screw lobes for a continuous 100% duty cycle. Bulkhead fittings ensure a quick, simplified hookup.

Models range from 30 to 65 CFM.
