UTILITY & TELECOM TRAILERS ★

KEEP PRODUCTIVITY MOVING

Save Time With Stellar® Utility & Telecom Trailers

TIME-**SAVING** SOLUTIONS

Stellar® Utility and Telecom Trailers are ruggedly built so they can go directly to the installation site, so you won't have to park away from job sites and transport materials in another way. You'll save time by hauling cable reels, coil pipe, stick pipe, utility poles and more to the exact spot where you need them.

Behind the streamlined design of Stellar Utility and Telecom Trailers is the precision assembly of high-quality materials. Whether you need to haul heavy materials or go off-road through rough terrain, Stellar trailers are built to last.

Easy Loading & Unloading

Because Stellar Utility and Telecom Trailers are highly efficient, they're used by rural electric power companies, municipalities, gas companies, utility construction/telecom companies and a wide variety of other markets. Some models are self-loading, and all are designed to help maximize jobsite productivity.

Self-Loading Single-Reel Cable Trailers

Transport reels from 3,500 to 14,000 lbs with trailers sporting an engine-driven or manual hydraulic pump to easily load reels. Select models feature a cordless drill pump for faster, quieter reel loading — no manual effort or engine power needed. It's an efficient alternative designed to suit a variety of jobsite needs.

Self-Loading Multi-Reel Cable Trailers

These are ideal for operations in which there are multiple lines of cable to be pulled or laid. Plus, no forklift is needed to load and unload a reel. The reel bar on the trailer hydraulically lowers to pick up a reel and then raises it to a locked position to be transported.

Drop-On Single-Reel Cable Trailers

The simple, practical and economical choice for transporting reels up to 2,000 lbs and 8' in diameter.

Drop-On Multi-Reel Cable Trailers

Efficiently and reliably transport up to three reels of conduit, innerduct and other reel-mounted materials.

Coil Pipe Trailers

Save time loading, transporting and unloading coil pipe with a self-loading 102" carousel. The payload is up to 1,500 lbs for the hand pump model or up to 3,000 lbs for the electric pump model.

Utility Pole Trailers

Perfect for cargo and material handling, with models to fit a wide range of utility pole lengths. IPT Utility Pole Trailers are available with retracted lengths starting at 22' and extended lengths up to 60', depending on the model. ICP models offer a 21' retracted length and extend to 31', with built-in cargo boxes for transporting additional materials and tools.

Gas & Stick Pipe Trailers

With rear telescoping and front-and-rear telescoping options available, you'll be able to transport large, heavy utility stick pipes and gas pipes to and from your jobsite with ease.
